MANAGEMENT INFORMATION SYSTEMS DEPARTMENT

General Information

Sakarya University, Business School- Department of Management Information Systems, as one of the five departments of the Faculty of Business, provides Bachelor's, Master's Degrees with thesis, Master's without thesis and Doctorate education. Since the 2013-2014 academic year, our department has been providing graduate education and since the 2016-2017 academic year, our department has been providing doctoral education. The faculty members of our department are academicians who specialize in the managerial, technical, strategic and organizational elements of Management Information Systems and actively conduct applied and theoretical research on Management Information Systems.

Management Information Systems is an interdisciplinary field of study that includes informatics, management and computer concepts. Information Systems has entered every stage of our lives and has radically changed our lives. Decision support systems basic data for managers' decisions and started to be used in intensive businesses as basic systems that provide information. Being able to establish effective communication and interaction between non-technical personnel and technical personnel in the enterprise has been critical for the success of organizations. All these developments have greatly increased the demand in the private sector and the public sector for management information systems graduates.

The experiences students have gained within the scope of the 7 + 1 professional practices course in the 8th semester make them experienced management information systems experts before they graduate.

For this reason, students have already decided on their career paths and they enter the market as well-equipped graduates.
