I have an idea !

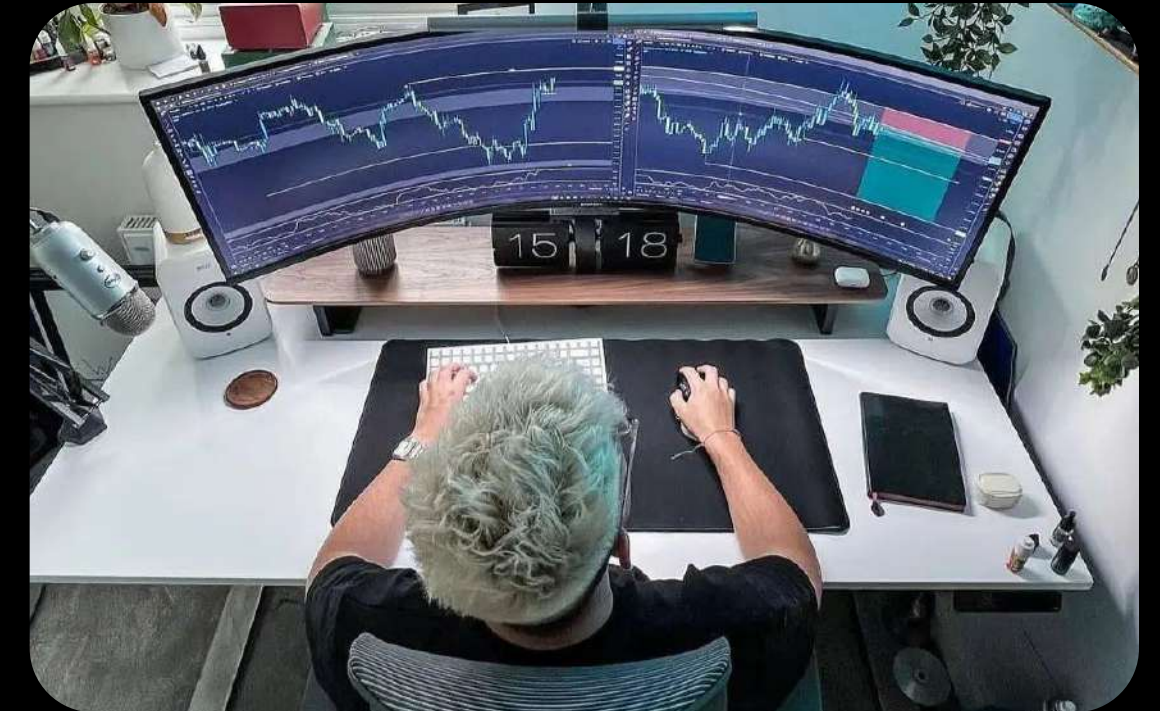

Where the world charts, chats and trades markets

For over 10 years, TradingView has quietly been building the most versatile financial site on the web, and we are now the largest social platform in the world for traders and investors.

The product combines a web-based financial analytics platform with a thriving community made up of market participants, beginner investors, and everyone in between.

Ask your students about TradingView – chances are, they're familiar with us

Ask your students about TradingView – chances are, they're familiar with us. Matter of fact, 25% of our users are young people of 18-25 years old. That's about 12,500,000 monthly visitors

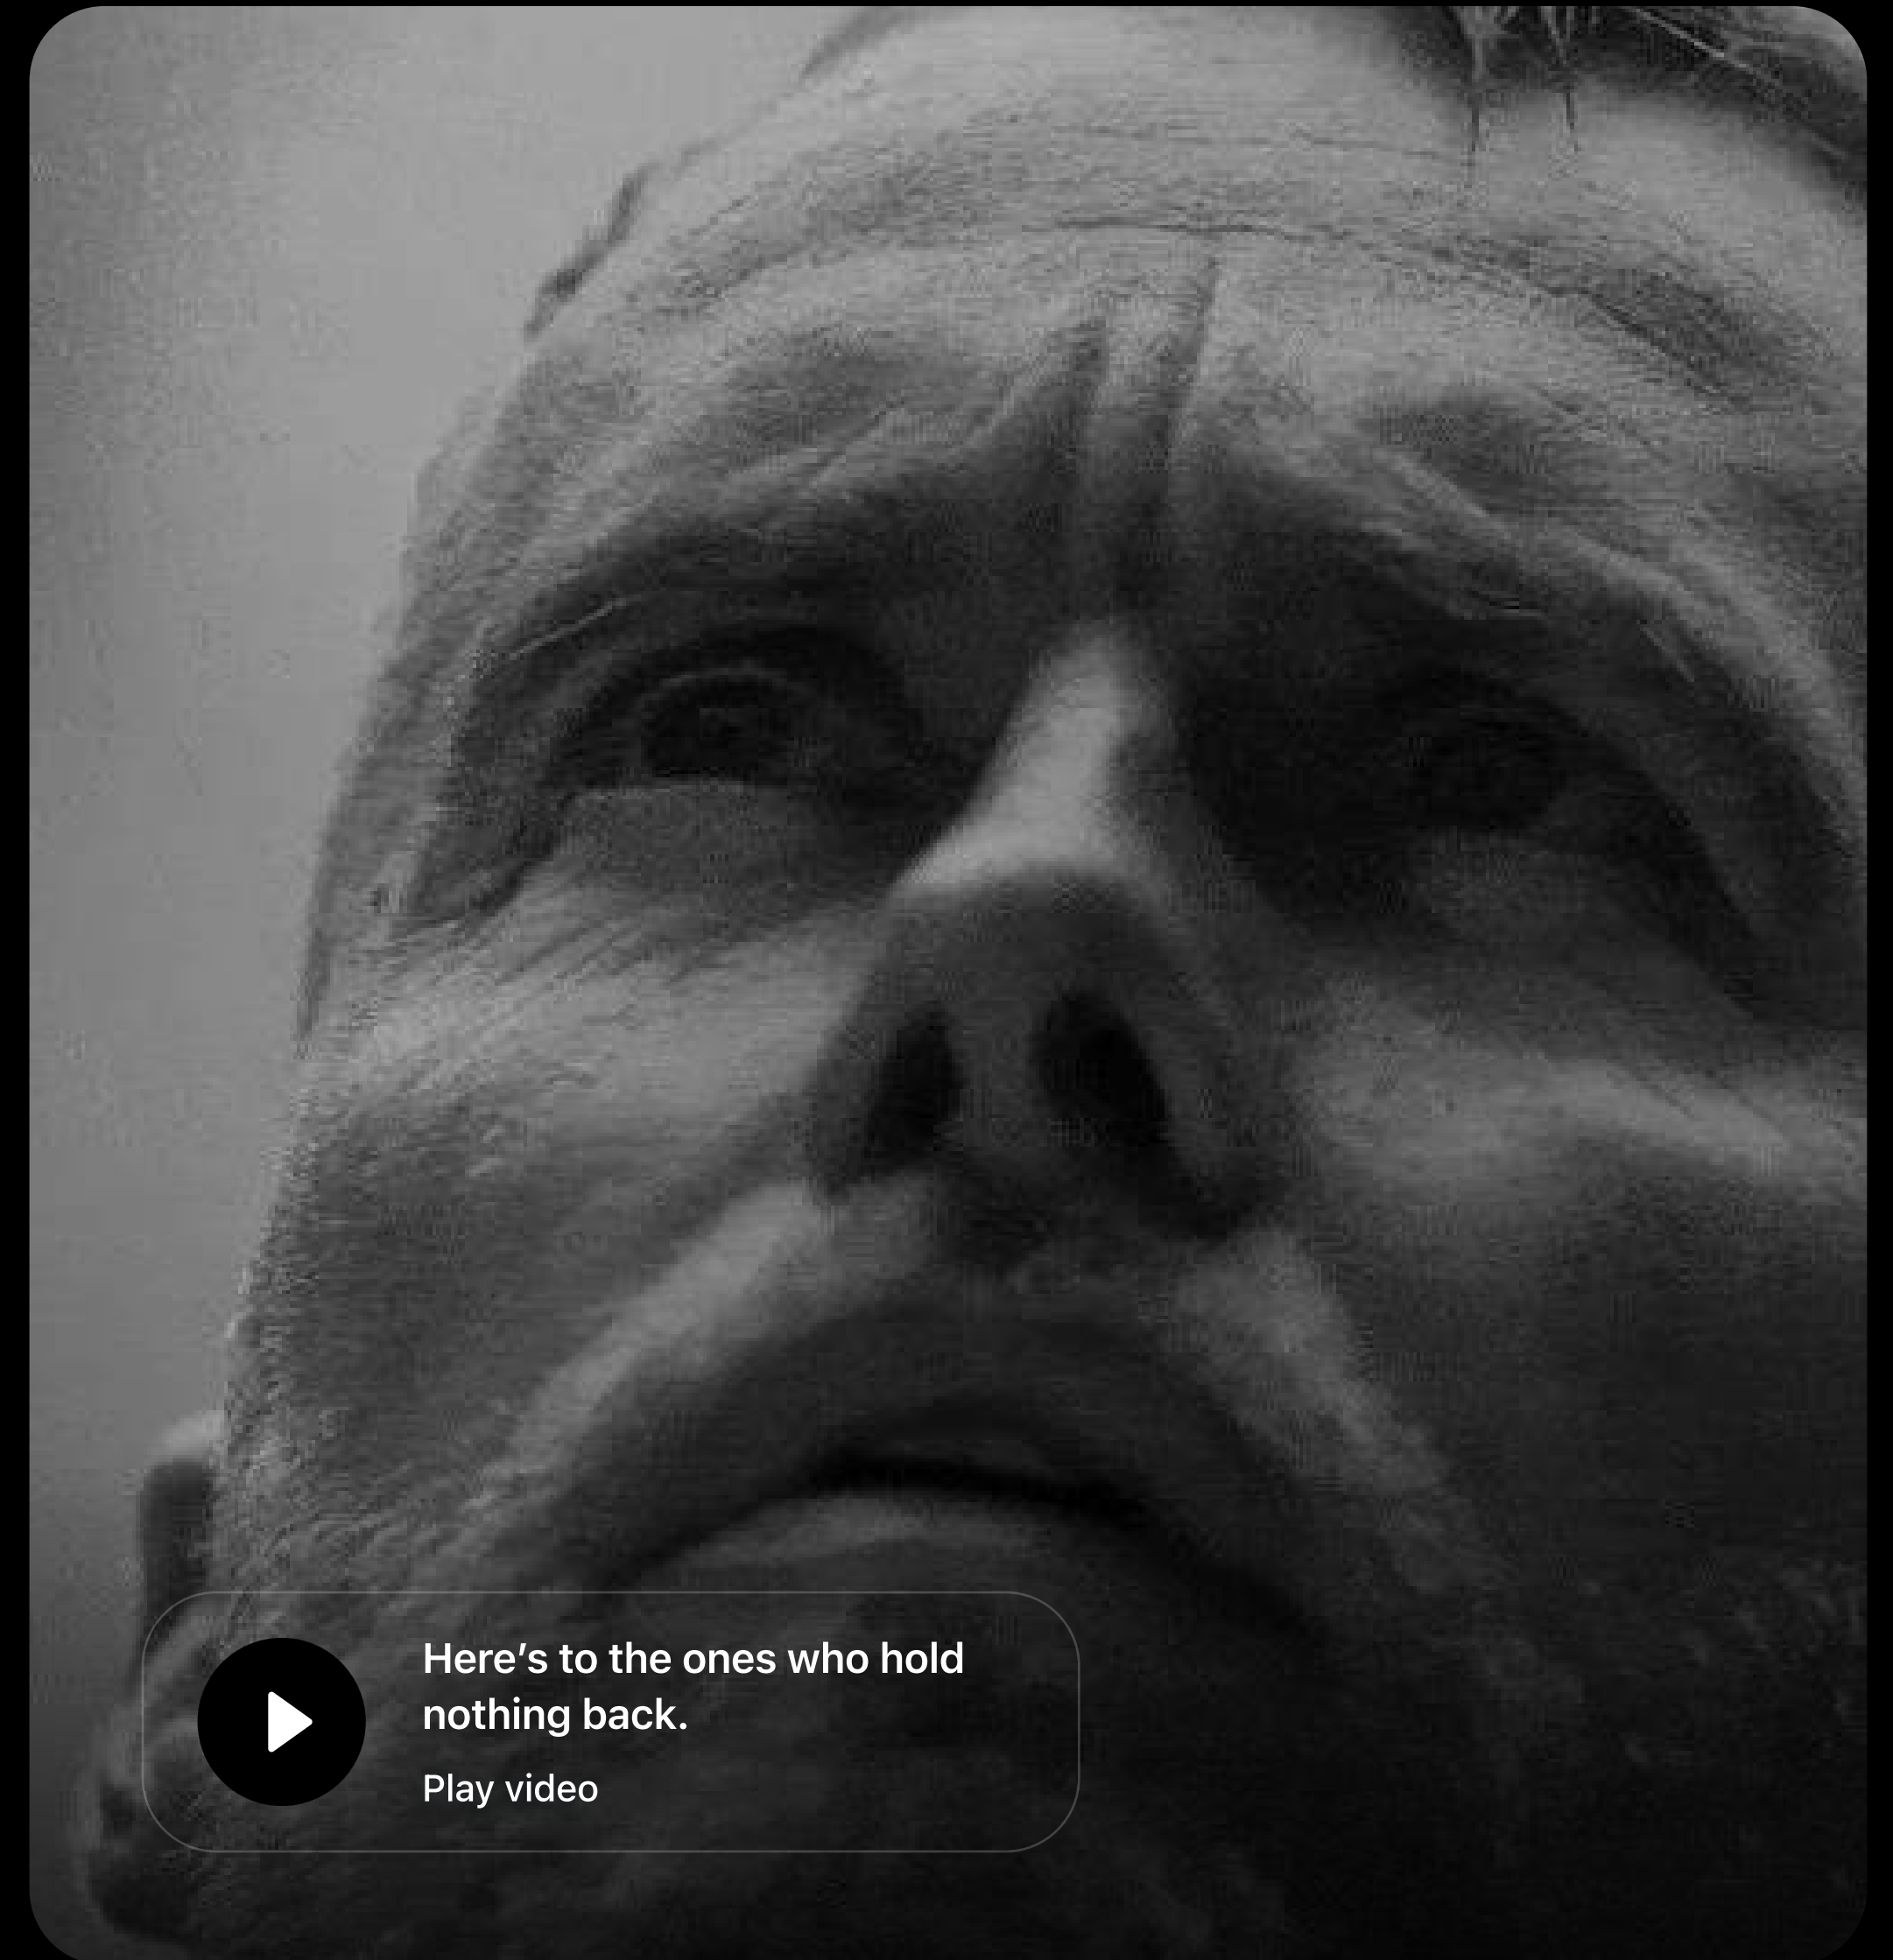

With a team of over 200 engineers, we're constantly offering more features on our desktop and mobile platforms while adding a fast-growing list of datasets, languages, and functionality.

Look first / Then leap

That's our philosophy – it doesn't matter who you are or what you're trading, the best way to maximize returns is to prepare first and then commit, and we see this spirit in our users every day.

In support of this manifesto, we not only provide unique charting and trading solutions for advanced traders and investors, as well as other finance and investing-related platforms, but we also collaborate with top tier universities and business schools to support students and academics around the world.

Here's to the ones who hold
nothing back.

Extensive opportunities for learning

Under the guidance of academic staff, the use of our charting tools allows students to:

- Get free access to advanced features of the TradingView platform and market data;
- Gain a fundamental understanding of the core concepts of technical analysis;
- Chart and track their assigned investment portfolios as well as contribute ideas to the TradingView community;
- Learn how to build critical charting skills for work or personal growth;
- Learn how to make sense of price movements, predict time frames, and gain an understanding of market volatility.

Extensive opportunities for learning

Unique tools for educators:

- An opportunity to integrate TradingView's access to practical exercises;
- Instant access to global assets to create meaningful reference points for case studies;
- Ability to produce and share simple and detailed charts in an image format or a link format to support learning materials or supporting documents, without technical embedding requirements;
- Access to both technical and fundamental information in a central location to avoid "googling";
- Official and trusted data sources for confidence in your references, improving mentor confidence;
- No operational requirements of IT hardware. An internet connection is all that is required.

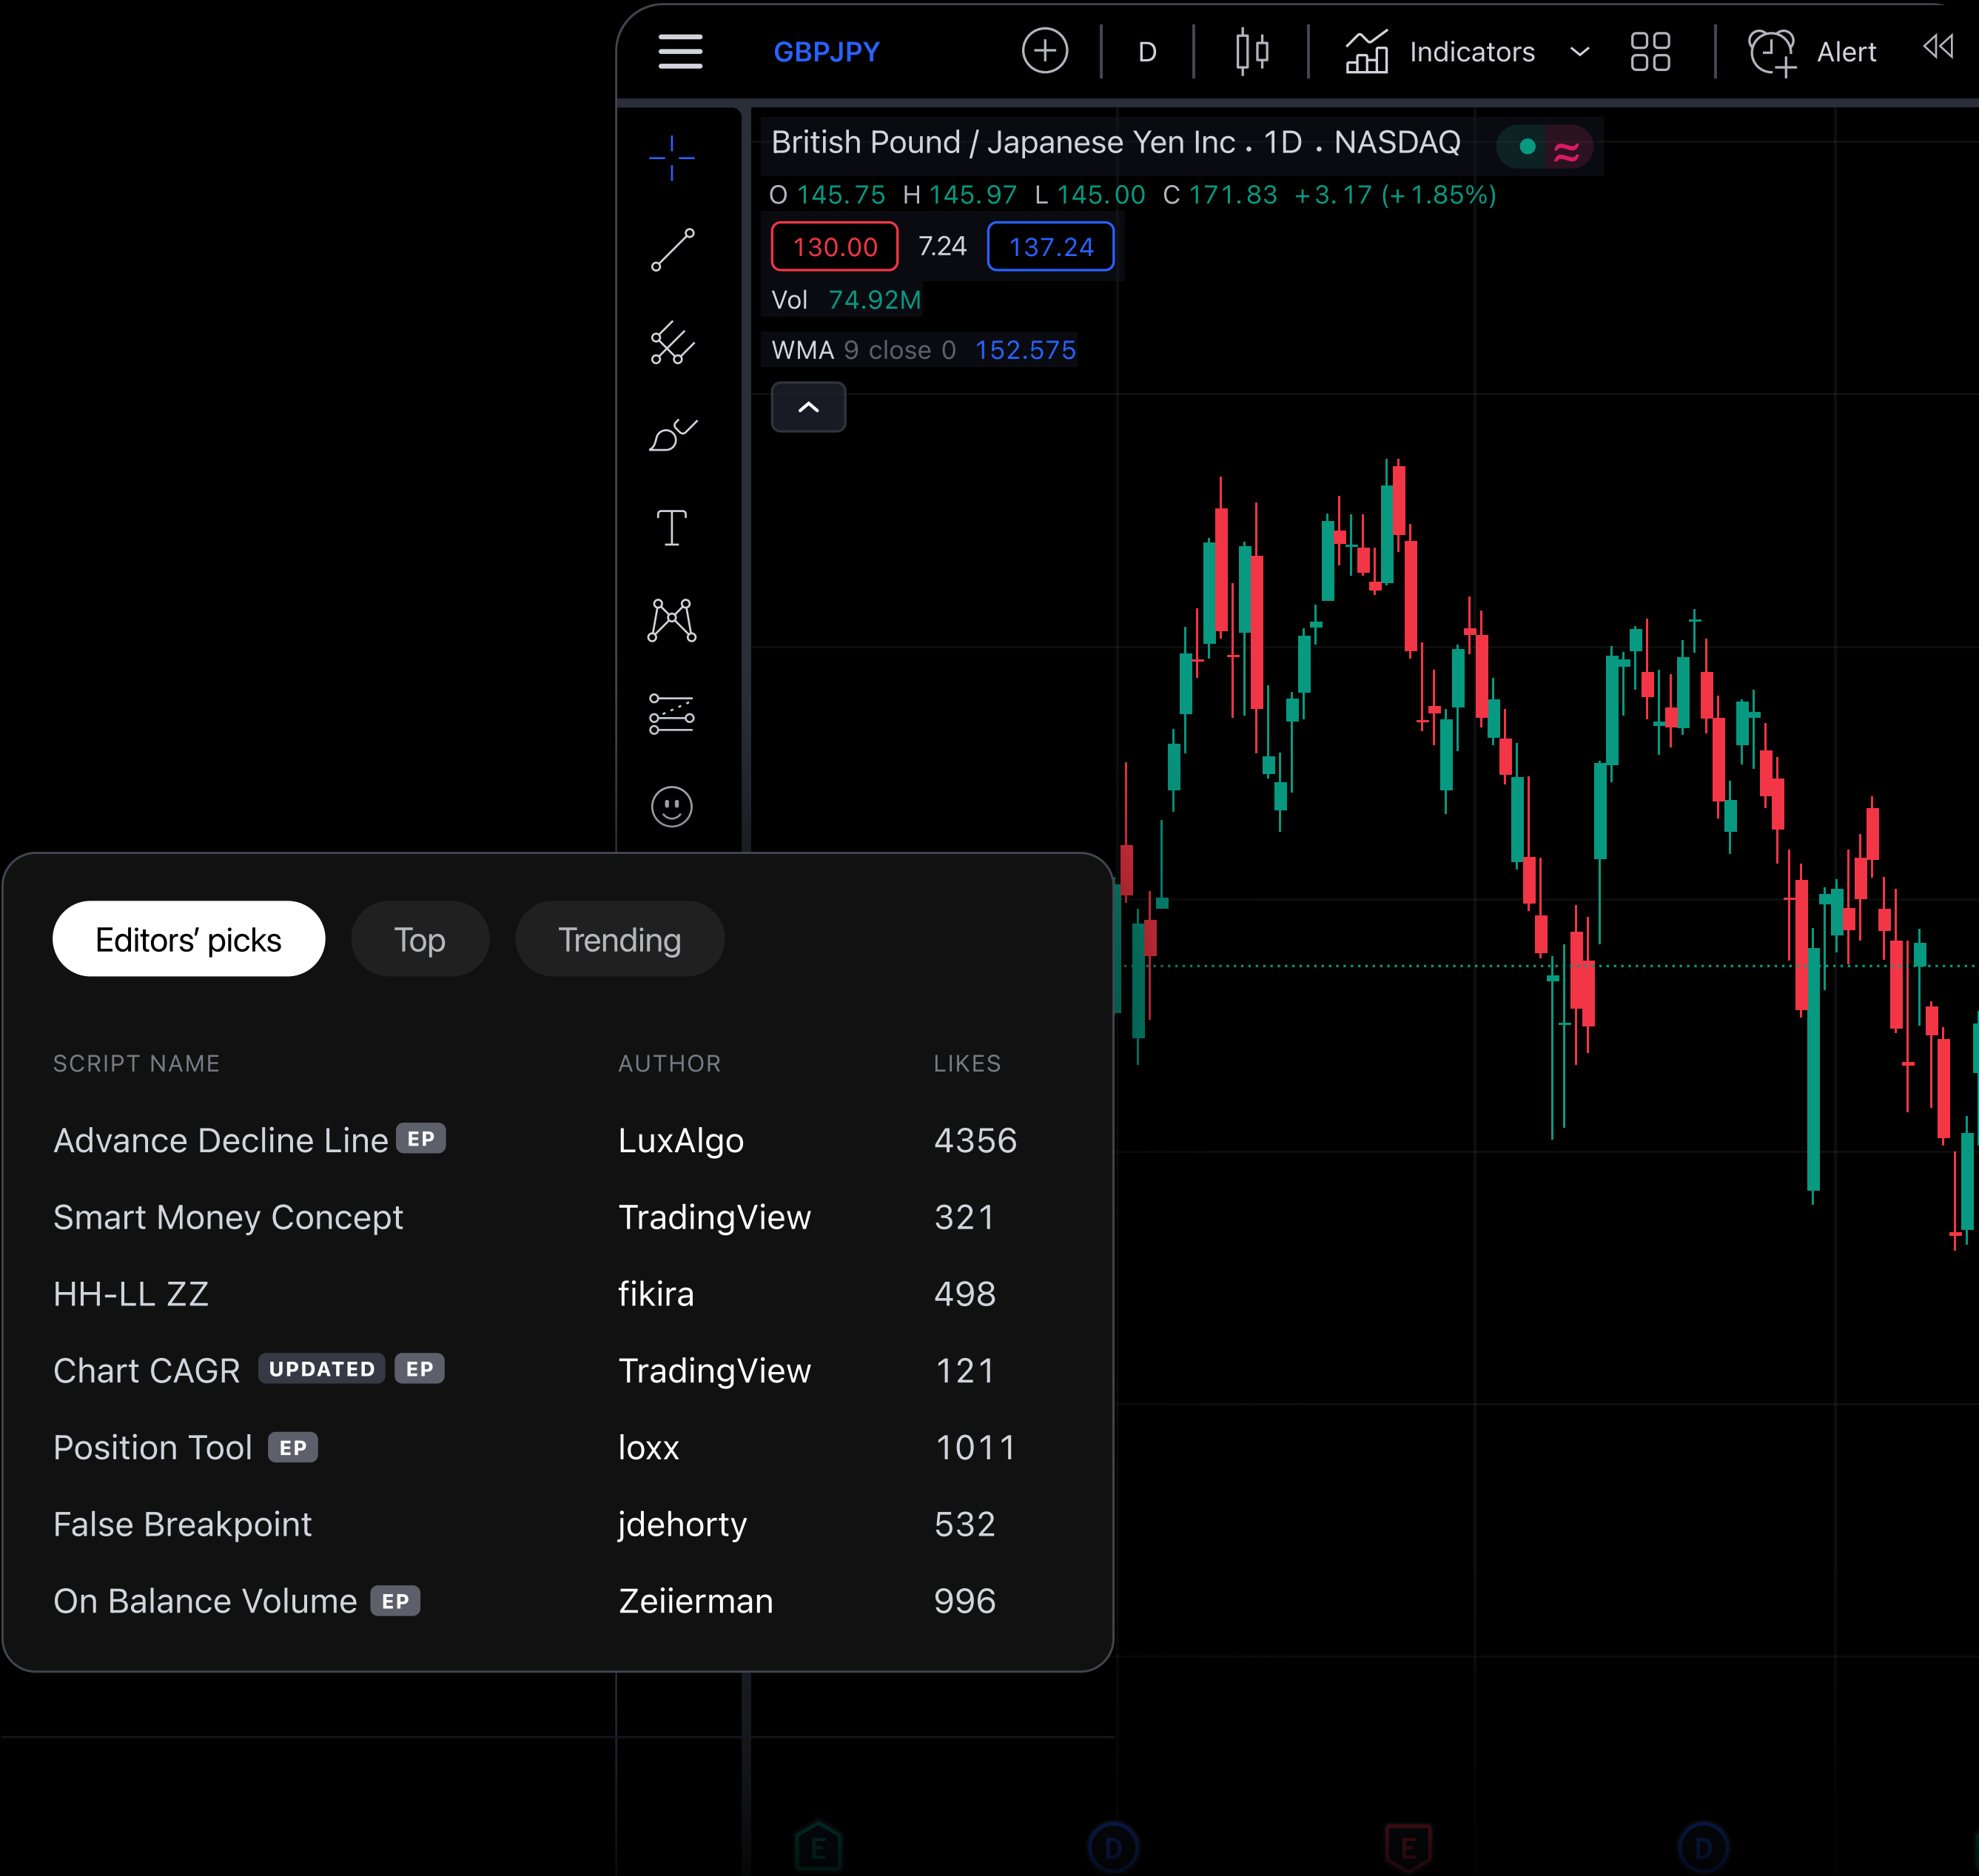

Opportunities • 07

Unparalleled technical analysis features

Our platform comes with hundreds of pre-built studies, 50+ intelligent drawing tools and a set of instruments for in-depth market analysis, covering the most popular trading concepts.

- 100+ pre-built most popular indicators;
- 100,000+ community-built indicators;
- 50+ smart drawing tools;
- Volume Profile indicators;
- Candlestick patterns recognition;
- Multi-timeframe analysis.

One could ask - what does TradingView gain from collaborating with academic institutions?

- Firstly, as a company we've always aimed to contribute to the global investor community from the early stages of any young professional's career;
- Secondly, it is of course a fantastic opportunity to boost our exposure and brand awareness globally.

Here is how educational partnerships like these play a role

- The TradingView logo is posted in the "Partners" section on the website of the educational institution;
- A publication about the start of our partnership on the partner's website;
- Encouragement to use TradingView as a reference/source in studies;
- Special tasks and exercises in the curriculum dedicated to using the TV platform;
- Students are able to contribute ideas to our platform;
- Academic staff hosting webinars on TradingView.
